

1)WRITE A JAVA PROGRAM TO CREATE A USER-DEFINED INVALIDAGEEXPTION AND CHECK WHETHER A PERSON IS ELIGIBLE TO VOTE

PROGRAM:

```
import java.util.Scanner;
```

```
class InvalidAgeException extends Exception {  
    InvalidAgeException(String message) {  
        super(message);  
    }  
}
```

```
public class Main {  
    public static void main(String[] args) {  
        Scanner sc = new Scanner(System.in);  
  
        System.out.print("Enter age: ");  
        int age = sc.nextInt();  
  
        try {  
            if (age < 0) {  
                throw new InvalidAgeException("Invalid age");  
            }  
  
            if (age >= 18) {  
                System.out.println("Person is eligible to vote.");  
            } else {  
                System.out.println("Person is not eligible to vote.");  
            }  
        }  
    }  
}
```

```
    } catch (InvalidAgeException e) {  
        System.out.println(e.getMessage());  
    }  
  
    sc.close();  
}  
}
```

OUTPUT:

Enter age: 20

Person is eligible to vote.
