

6)Write a Java program to create three threads with different priorities and display their priority values along with their execution details.

PROGRAM:

```
class MyThread implements Runnable {

    public void run() {

        Thread t = Thread.currentThread();

        System.out.println("Thread Name: " + t.getName());

        System.out.println("Thread ID: " + t.getId());

    }

}

public class Main {

    public static void main(String[] args) {

        MyThread obj = new MyThread();

        Thread t1 = new Thread(obj, "Thread-1");

        Thread t2 = new Thread(obj, "Thread-2");

        Thread t3 = new Thread(obj, "Thread-3");

        t1.start();

        t2.start();

        t3.start();

    }

}
```

OUTPUT:

Thread Name: Thread-1

Thread ID: 12

Thread Name: Thread-3

Thread ID: 14

Thread Name: Thread-2

Thread ID: 13
